

Corporate Fact Sheet

| | |
|----------------------------------|--|
| Company: | Barracuda Networks provides powerful, easy to use and affordable enterprise-class spam and virus protection solutions. These hardware solutions are built for businesses of all sizes. |
| Products: | <p>The Barracuda Spam Firewall supports 1,000 to 30,000 active email users with no per user licensing fees. Multiple units can be clustered for redundancy and even greater capacity. There are four models:</p> <ul style="list-style-type: none">• The Barracuda Spam Firewall 200 processes 1 million messages per day and supports 1,000 active email users.• The Barracuda Spam Firewall 300 processes 4 million messages per day and supports 2,000 active email users.• The Barracuda Spam Firewall 400 processes 10 million messages per day and supports 10,000 active email users with redundancy.• The Barracuda Spam Firewall 600 processes 25 million messages per day and supports 25,000 active email users.• The Barracuda Spam Firewall 800 processes 30 million messages per day and supports 30,000 active email users. <p>Energize Update subscription service provides automatic updates to the Barracuda Spam Firewall, continuously enhancing spam and virus protection, while eliminating administrative overhead.</p> |
| Technology: | <p>The architecture leverages open source virus and spam solutions in conjunction with ten defense layers. The ten defense layers are: 1) Denial of service and security protection, 2) IP block list, 3) Rate control, 4) Virus check with archive decompression, 5) Proprietary virus check, 6) User specified rules, 7) Spam fingerprint check, 8) Intention analysis, 9) Spam rule-based scoring and 10) Bayesian analysis. This architecture minimizes the processing of each email, which yields the performance required to process millions of messages per day. Unlike software solutions, the Barracuda Spam Firewall reduces the load placed on the email server by off-loading both spam and virus filtering.</p> |
| History: | <p>Barracuda Networks is a privately held company with headquarters in Cupertino, California. The company was founded on the premise that spam is growing at an exponential rate and poses a tremendous threat to every company's productivity, and the optimal answer is a dedicated plug and play hardware solution. Barracuda Networks provides an enterprise-class spam and virus protection solution that has the ease-of-use and affordability that businesses demand.</p> |
| Customers: | <p>Barracuda Networks has more than 11,000 customers worldwide including CBS, Coinstar, Georgia Institute of Technology, IBM, KPMG Consulting, North Carolina Highway Patrol, Texas A&M University, UCLA, Union Pacific Railroad, USC, U.S. Treasury Department, Varian Medical Systems and WebPex.com</p> |
| Sales & Distribution: | <p>Barracuda Networks offers direct online sales and supports reseller channels to best service the needs of small to large businesses.</p> |
| Contact Information: | <p>10040 Bubb Rd., Cupertino, Calif., 95014 Phone: 408-342-5400 or 888-ANTI-SPAM Fax: 408-342-1061 www.barracudanetworks.com</p> |
